

Method: **Jigsaw**

In the University of Humanities and Economics (AHE) Daria Modrzejewska has been trying out the Jigsaw method with her course on Pathologies in society.

Here are the steps Daria takes with the class in applying this method:

- Daria divides students into 5- or 6-person jigsaw groups.
- Daria divides the day's lesson into 5 segments.
- She assigns each group to learn one segment. They discuss the information of their segment and to rehearse the presentations.
- The students counts to 5 and make new groups 1s together, 2s together and so on.
- Daria asks each student to present her or his segment to the group.
- To sum up, Daria creates a quiz for all the groups presented on the screen.
