

Approach: Lecture capture

In the University of Humanities and Economics in Lodz (AHE), Elżbieta has been using the Lecture capture method with her course on Fundamentals of Graphic design for Culture Study faculty which is run with approximately 20 students. In this case the description refers to the class supported with the e-learning platform.

Here are the steps Elżbieta takes with the class in applying this approach:

1. She invites students to join an online meeting via AHE's e-learning platform (moodle) and sets a date.
2. She prepares materials including: links to videos related to the content of the course and power point presentation.
3. She uses Click meeting tool to video tape the lecture, while she is presenting to students.
4. The captured lecture is then made available to the students.

<p>The date of the lecture is given on the e-learning platform, and students are invited to attend.</p>	
<p>The lecture is made available for students</p>
